

PRODUCTION LINE A / B 08-24 - UPGRADE

The market is growing together with us

We've planned a major upgrade to one of our main production lines, for the A and B series models in size from 08 to 24.

In order to allow for this major investment in new innovations, we will **suspend** the productions of the A and B series, for the model from 08 to 24, from **15th November 2018**.

We have anticipated the demand for these units and have been working hard to build enough fin stock to meet normal demands during this period.

However we suggest that you consider your requirements and advise us as soon as possible, in order that we can minimize any disruption and continue to guarantee fast deliveries of these ranges.

In addition to this current upgrade, we also did major investments this year, in putting in an additional production line for our F series Models, which will be unaffected by this work.

The A and B series Upgrade will be complete by the end of the Christmas break, the full production **resuming** on **7th January 2019**.

Thank you for your attention, and please contact us if you have any questions: sales@recuperator.eu
